Subject: Pinewood derby Rules Rev 1.5 explained
Date: Jan 13th 2012

Hello everyone.

I screwed up...I guess my editor quit or something. I want to apologize for this confusion with Pinewood Derby District Rules Ver 1.4 as I guess there were quite a few hick-ups in there. I have gone ahead and submitted a corrected version of the rules now designated Rev 1.5 and these should have the rest of the bugs worked out.

In Revision 1.4 there are some errors in the designation numbers of the rules. For example in Rev 1.4 Rule 2.14-o you will see additional rules explaining 2.14-o but they are designated 2.14-m subsec 1-5 this has been corrected. There has also been a mess up concerning several references to rule 4.5 which doesn't exist in this revision of the rules. The rule reference in question is actually 4.10 that is trying to be referenced. So the designation of Rules 4.9 through 4.12 have been re-designated 4.4-4.7 The rules themselves have not changed just re-designated.

There has been one rule modification. The rule is 3.1-b which is a overall width measurement of the cars. It says the cars width can be 3 1/4 inches wide which could exceed track lane widths on most Pinewood derby Tracks. So the rule has been modified to be 2 3/4 inches which is slightly wider than a standard cars finished wheel base. This spec should fit within tolerances of most pinewood derby tracks out there.

Sorry for the last minute changes. I will try to make sure the new Rules Revision is out there in for circulation. I hope we do not have to make any more corrections. I am sure this should be the last rev made. Wish us all luck as I wish you all luck in your Pinewood derbies this year. If any of you have questions email me at circleofone555@hotmail.com or call me at 660-6061

Sincerely,

Chris Bernier
